User guide — KINEVA FIT

Version: 1.3 · **Date:** 11 October 2026
Audience: app users (all plans, including Free)
Published languages: Italian · English (for other UI languages)

This guide covers **how to use the app only**. It does not include development, Mac install, or technical setup steps.

Where to find it: Settings → Base → *Guides & help* · or on the KINEVA FIT website (footer → Guides).

---

1. What KINEVA FIT is

KINEVA FIT helps you **create and follow workout routines**, keep history, and (on Pro plans) manage multiple clients.

It is not a medical device. “Attention areas” are training preferences, not diagnoses.

Platforms: Android · iPhone · iPad · Apple Watch (Watch features from Athlete Pro).

---

2. First launch

1. Open the Privacy Policy and EULA and confirm you have read them.
2. Accept the training disclaimer.
3. Complete onboarding (language and basic tips).
4. (Optional) Start the free trial or pick a plan.

Onboarding also shows where to open this guide later.

---

3. Moving around the app

Bottom bar

Tab	Purpose
Home	Your routines, start workout, new routine
Calendar	Day schedule and appointments
Data	Charts and progress
History	Completed sessions
More	Settings (Base and, if enabled, Trainer Pro)

Useful menus

Where	What it does
☰ on Home	Drawer: profile, clients, subscription
⋯ on a routine	Menu: edit, schedule, export, Watch…
▶ on a routine	Start the runner

The header shows plan, role (Athlete / Trainer / Supervisor) and active client.

---

4. Plans at a glance

Plan	In short
Free	1 routine, 1 group, max 15 exercises, **3 AI credits/month**. No GPS/distance, Watch, routine PDF, multi-client
Athlete Pro	GPS/distance, Watch, routine PDF (table), full catalog, 3 AI credits/month, 1 profile; Pilates add-on

Plan	In short
Pro Plan	Everything in Athlete + trainer area up to 8 clients, PDF manual/image, segmented encyclopedia (Upper/Lower/Core/Mobility), T21, 50 AI credits
Studio & Gym	Everything in Pro Plan + unlimited clients, multi-trainer (3 staff seats), mobility/posture **protocols**, **full PDF encyclopedia** (entire catalog), 150 AI credits
Exercise limit / routine	Free max **15**; Athlete/Pro/Studio: warning past **~50**, hard safety cap **100** (circuits counted)
Pilates pack	One-time add-on (requires Athlete Pro+); separate from Studio mobility protocols
AI booster packs	Consumables: +2 **€1.49** · +10 **€7.99** · +30 **€24.99** (credit top-up, all plans)

Prices and renewals are handled by the App Store / Google Play.
The free trial (if offered on the Store) is tied to your Store account.

---

5. Home and routines

- **New routine:** Home → **New Routine** (editor, AI, photo, template, free workout; options depend on plan).
- **Groups:** organize several routines together.
- **▶:** starts the workout.
- **⋯:** duplicate, archive, template (not Free), schedule, export, send to Watch (Athlete Pro+).

Manage mode

Home → **Manage** → select routines or groups → Send to Watch / Select all / Delete → ✕ to exit.

Free limits

1 active routine · 1 group · max 15 exercises · no distance/GPS.

---

6. Routine editor

1. Add exercises from the library.
2. In the library you can filter by type: **All** · **Fitness** · **Mobility** · **Pilates**.
   - **All** shows only what you have already unlocked.
   - **Mobility** and **Pilates** are always browseable: if the pack/group is locked you see a clear preview label (Pilates pack or Mobility group) and cannot add it to the routine yet.
3. Set sets, reps, load, rests (and advanced methods if your plan includes them).
4. **Distance / GPS** measures require Athlete Pro+.
5. Save: the routine appears on Home.
   (End-of-workout reminder and gym-bag checklist are global settings: Settings → Base.)

6bis. Exercise library and detail card

The catalog includes **hundreds of exercises** (fitness, mobility, cardio/swim and, with the add-on, Pilates). Each entry has a Gym Visual GIF, description, execution tips and a muscle map.

In the library, exercise picker, routine editor, Home and Runner: **tap the GIF icon** (or the info button) to open the **exercise detail** with description and notes:

Item	What it shows
GIF	Movement animation (Gym Visual)
Muscle groups — Primary	Main muscles of the movement
Muscle groups — Secondary	Synergists and stabilizers (when listed)
Silhouette	Highlighted zones aligned with primary/secondary tags (front/back)
Description / execution	Movement steps and practical tips
Equipment / unsuitable for	Setup and cautions tied to profile attention areas

Muscle labels and silhouettes are **teaching simplifications**: they do not replace professional assessment. On Home and in the editor you can also toggle the routine **muscle map** (macro bar or silhouette) for a quick view of what the routine targets.

---

7. Runner (workout)

1. From Home tap ▶.
2. (Optional, at home) If **bag checklist** is on in Settings → Base, Home shows a bag icon: open it *before* you leave, tick items and listen to the voice guide. It does **not** appear when you tap ▶ (you're already at the gym).
3. Follow timers, rests and voice cues.
4. **Pause / Resume:** with auto-advance (or T21), **double-tap** the screen (same as Apple Watch), including during rest; the blue ▶ button remains only when auto-advance is off. Stops voice guidance and says *Paused*; on resume it says *Resuming*. An orange **PAUSED** banner appears under the top bar (*Double-tap to resume*).
5. **Exercise navigation:** the labeled *Previous exercise* / *Next exercise* buttons (and ⏮ / ⏭ in the app bar) jump between exercises; the bottom ↺ control **replays the set** (during rest it cancels rest and redos the set just finished; during work it goes to the previous set or restarts the current one); ✓ completes the step. **SKIP** marks the current exercise as skipped.
6. Routines with distance/GPS: Athlete Pro+ only.
7. After the session, see the summary in **History**.
8. **End-of-workout reminder (optional, global):** in Settings → Base you can set a message (e.g. *remember the water bottle*). It appears on every workout summary and is spoken by the voice guide (including Apple Watch).

---

8. Apple Watch (Athlete Pro+)

Requirements: Athlete Pro plan (or active trial), KINEVA FIT on iPhone and Watch, Bluetooth on, Watch paired.

1. From iPhone: **Watch** app → KINEVA FIT → Install.
2. Open **KINEVA FIT on the Watch at least once**.
3. Send a routine: Home → ⋯ → **Send to Apple Watch** (or Manage mode for several).
4. On the Watch: open the routine → **OPEN** → **START**.

If you see “not installed” but the icon is there: open the app on the Watch and send again.

Add the watch face complication via Edit face → **KINEVA FIT**.

---

9. Calendar, data and history

- **Calendar:** schedule and (Pro/Studio) appointments.
- **Data:** training and biometric charts.
- **History:** completed sessions, filters, detail; GPS map if present (Athlete Pro+).

Cloud history archive: Settings → Base (paid plans).

---

10. Export a routine

Home → ⋯ → **Export program** → choose format → channel (**File / Email / WhatsApp**).

Format	Typical plan
Compact / illustrated table (PDF)	Athlete Pro+
Program manual / HD image	Piano Pro / Studio

---

11. AI and photo import

- **AI Wizard:** suggests a routine (uses credits).
- **Photo import:** photograph a paper routine and **always review** the result.
  Needs a connection and available credits.

---

12. Useful settings

More → Base

- Language, audio cues, vibration, notifications

- **Speak exercise codes** (TRI 007 and similar before the name; can be turned off; your choice becomes the default)
- Appearance (theme, colors)
- Licensed devices (seat limit per plan)
- **Guides & help** (product website, this guide online / PDF)

Workout reminders (global — all plans)

Workout reminders section in Settings → Base (applies to **every** routine; not configured in the Editor):

Item	What it does
End-of-workout reminder	Free text or chips (water bottle, jump rope, towel, bands, locker key). Shown and spoken at the end of every workout (iPhone and Apple Watch).
Bag checklist	ON/OFF toggle. On first install it is already on with 8 factory items (shoes, socks, underwear, towels, toiletries, slides, swimsuit, goggles) — editable. When on, Home shows a bag icon (*Pack your bag*): use it at home before leaving. It does not open with ▶.

More → **Trainer Pro** (if your plan allows): studio tools, PIN, backup, routine cleanup.

Subscription: banner in the drawer or Settings → paywall · Restore purchases.

---

13. Trainer and Studio (Piano Pro / Studio & Gym)

For personal trainers and gyms:

- Clients from the drawer (**New client**): in the profile you can **add, edit and remove** physical notes / limitations at any time (they stay on the client as operator reminders).
- 4-digit PIN to protect the area (keep the recovery code).
- Assign routines, PDF/JSON export, exercise database (muscle / equipment / type **from fixed catalog lists only**).
- Every catalog entry includes GIF, primary/secondary muscles, silhouette, description and execution tips (same content as the athlete library).

- **Studio:** unlimited clients, mobility protocols, multi-trainer, full PDF encyclopedia (entire catalog; muscle segments remain on Pro Plan too).
- Print / PDF export of the **exercise library** (segment manuals or full encyclopedia): paid **Pro Plan / Studio** subscription only — **not** during the free trial.
- **Deliveries & Backup**, **history/biometrics CSV**, **full backup**, **history ZIP archive**, and **personal JSON export**: paid subscription only — **not** during the free trial.
- Routine PDF/image exports use silhouettes and YouTube QR; **Gym Visual GIFs stay in-app only** (never printed or exported).
- **Single-routine** export (table/manual PDF, HD image) and **progress reports** (JSON/PDF): paid subscription only — **not** during the free trial.
- **Colleague JSON import**: paid Pro Plan / Studio only — **not** during trial.
- **AI credits in trial:** max **10** (not the full plan 50/150); paid boosters remain available.

On iPad the trainer area is especially convenient for catalog and handoffs.

---

14. Pilates pack (add-on)

One-time purchase; needs at least Athlete Pro. Unlocks **49 Pilates exercises** (mat + machine) with notes and silhouettes.

Home → **New Routine** → **Pilates pack**
(or from the paywall, add-on card).

---

15. Common issues

Issue	Try this
Watch does not receive the routine	App on iPhone and Watch, Bluetooth on, open KINEVA FIT on Watch, send again
Free cannot import a template	Too many exercises or already 1 routine → upgrade
Disclaimer stuck	Open Privacy and EULA and tick both boxes
iPad stays Free after restore	Settings → Licensed devices: free a seat

16. Privacy and support

Legal documents: from the initial disclaimer or the Legal section of the site.
Support / privacy contact: `Support@synapse-digital-adv-app.com`.

---

17. Quick paths

I want to...	Where
Create a routine	Home → New Routine → Create routine
See muscles / silhouette for an exercise	Editor → + exercise → open detail
Work out	Home → ▶
See history	History
Export PDF	Home → ⋯ → Export
Send to Watch	Home → ⋯ → Send to Apple Watch
Create a client	☰ → New client (Pro/Studio)
Open this guide	More → Base → Guides & help → User guide
Open the product website	More → Base → Guides & help → KINEVA FIT website
Manage subscription	Subscription banner / paywall
